

Date: 20th March 2007  
Location: Antenova, Cambridge

### Morning: Satimo

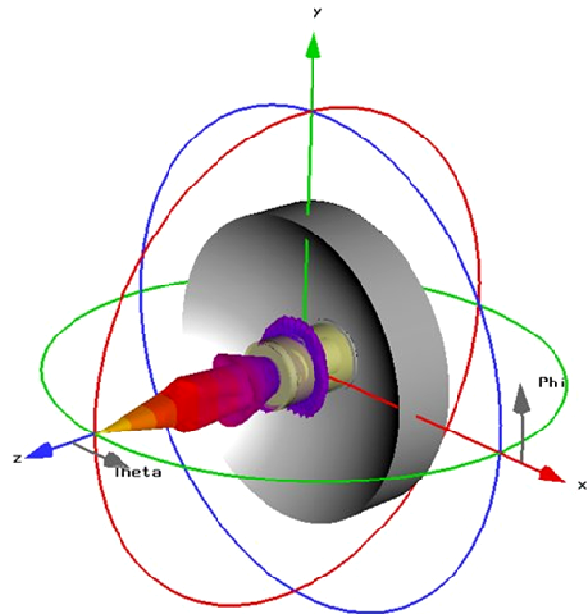

- Introduction to antenna measurement techniques
- Introduction to SATIMO multiprobe technology
- Presentation of SATIMO products portfolio
- Use of SATIMO systems for active measurements of wireless devices
- Demonstration: Measurement of various antennas and wireless devices, including one which will be modelled with CST MICROWAVE STUDIO® during the afternoon session

### Lunch

### Afternoon: CST

- Introduction
  - Overview
  - Theory: FIT, PBA, complete technology
  - Workflow integration
  - Application examples with emphasis on antennas
- Hands-on session based on a measured antenna example from Satimo's morning session, using CST MICROWAVE STUDIO® / CST DESIGN STUDIO™
  - Antenna setup
  - Simulation
  - Postprocessing
  - Parameter sweeps / optimisation
  - Circuit/EM co-simulation

This workshop is free to attend.  
Advance registration is requested.
